INTERESTS

Software Development:

https://mbuthia.vercel.app

https://github.com/MbuthiaWaKihara

I build software both for their monetary value and for fun. Having started out in 2016, I have an endless thirst for knowledge in regard to writing code, optimizing performance and scaling.

I have worked on various projects, ranging from large commercial projects to small personal projects. I enjoy writing code and learning. I love working with productive teams to build systems that solve real world problems.

For more information, see my portfolio website on the first link in this section, and my GitHub profile on the second.

Chess:

Active member of the university chess club, where we occasionally hold or attend chess tournaments.

Chairman of the Chess Club in Kagumo High School, 2014 – 2015.

Active chess player nationally, ranked top 100 nationally by FIDE (World Chess Organization).

Cubing:

I have interest in solving Erno Rubik's magic cube. I attended several competitions for solving the Rubik's Cube as fast as possible, and averaged around 30 seconds solving the standard 3x3 cube. I also helped mobilize the sport by organizing some competitions myself.
